IT services

We are providing IT services that are focused on app development and web development.

We have a dedicated team for handling this field and for providing constant help and services for our clients.

Non IT services

We are also providing non IT technical services that mainly focused on 3D printer manufacturing, 3D printing, Project development, Prototype making, Home automation, Robotics, and electronics components delivery.

Other services

We are having a dedicated service team for providing customer and technical support teams which is dedicated to providing these services to other organizations.

These services will include chat and voice support for the client in local languages, English, and Hindi.

Educational services

Recently we are stepped into the education field. We are providing technical skill development programs, Certification courses, and Educational consultancy.

Also, we have started an online journal that includes science and technology, Arts, Interview talks, and other content.
